Be the Knight in

WEARFIX™ ARMOUR COATING

WearFIX™ has been designed for highly demanding applications where standard epoxy and grouting compounds are simply unable to perform.

The hardness of the ZAC grains combined with the specially designed interlocking grain structure provides superior performance.

This unique interlocking grain structure prevents grains from breaking away and provides a highly durable compact structure.

WearFIX™ offers corrosion resistance to harsh environments in both acid and alkali.

**BONUS:
TROWEL &
GLASSES**

TOUGH SURFACE PROTECTION & REPAIR,
Without the environmental impact

Trowel
Apply using trowel.

High
Abrasion & mechanical resistance
